

Journal of Geodesy and Geoinformation is a peer-reviewed, semiannual, open access and widely distributed periodical, published by UCTEA Chamber of Surveying and Cadastre Engineers, Turkey. The Journal was published under the name of "Hkm Geodesy, Geoinformation and Land Management" between 2003 and 2011.

Aim and Scopes

Journal of Geodesy and Geoinformation covers a broad range of research topics in geodetic and geoinformation sciences and technologies. Besides the traditional areas it also includes study fields concerned with the earth sciences, earth oriented space sciences and related interdisciplinary subjects.

The journal publishes peer-reviewed papers in the fields listed below in both English and Turkish, which are reviewed by at least two scientists and researchers.

- Surveying and Sensoric

- Mathematical, Physical, Space and Engineering Geodesy
- Earth Sciences
- Remote Sensing
- Photogrammetry
- Earth Oriented Space Sciences
- Cartography
- Geographical Information Systems and Technologies
- Land Management
- Software Development
